

## REMARKS

Reconsideration and allowance in view of the foregoing amendments and the following remarks are respectfully requested.

Upon entry of this Amendment, claims 43-60 will be pending in the present application. Claims 43-60 have been newly added, and claims 1-42 have been cancelled.

The specification has been amended above to indicate that the present application is a Divisional of U.S. Patent No. 09/817,434 ("the '434 application") filed March 26, 2001, and to identify the other parent patent application from which the present application claims priority under 35 U.S.C. § 120. Accordingly, applicant respectfully requests that the above amendments to the specification be approved.

Figure 7 is amended above to include text labels in the rectangular boxes as required in a parent application of the present application. Accordingly, applicant requests that the above amendments to Figure 7 be approved.

New claims 43-60 correspond to claims 57-74 originally filed with the '434 application. Claims 57-74 were restricted out of the '434 application, and, therefore, are presented in the present application, which is a Divisional from the '434 application. Original claims 1-42 have been cancelled.
